## Unit round-up

- 6** Complete the article with the words in the box.

appointment | break | caught | danger  
feel | matter | medicine | pain  
problem | temperature

### A day in the life of a doctor

In the mornings, I work in the accident and emergency department of a busy hospital. That's where you go if you (1) \_\_\_\_\_ a leg, for example. Most evenings, I am at my office and people can make a(n) (2) \_\_\_\_\_ to see me. Sometimes I go to people's houses if leaving the house might be difficult or a(n) (3) \_\_\_\_\_ to their health.

With some of my patients, it's easy to see what's wrong. They might have a(n) (4) \_\_\_\_\_ with an arm or a leg after an accident. But many people who come to me don't know what the (5) \_\_\_\_\_ is. For some reason they (6) \_\_\_\_\_ ill, but they don't understand why. They might have a(n) (7) \_\_\_\_\_ in the stomach or back, and that needs more careful examination. I usually start by taking their (8) \_\_\_\_\_ to see if maybe they have (9) \_\_\_\_\_ a cold or something. Sometimes they need to take (10) \_\_\_\_\_ for the problem. It's a good job but a very busy one!
